

## UPDATED TRAIL CONDITIONS:

Trail conditions as of March 14 at 10pm are good spring skiing on most trails.

All trails have been groomed March 14 evening, and most trail damage from golf course vehicles was repaired.

Track setting was not done.

Some trails are in fair to marginal condition in some areas due to sun exposure/melting, bare spots, icy conditions, or uneven surfaces.

Beware of the possibility of unexpected, significant trail damage from golf course maintenance vehicles.

The lower Intermediate loop is not recommended. The track setting is pretty much destroyed from the Golf course 4x4 truck and other vehicular traffic. The trails are ski able

The hills on most trails were especially destroyed and dangerous, but as of March 14 at 10pm are ski able.

Who knows how the trails will be after a day of work for the golf course staff Friday daytime.
